

SWAPNA GUDIKANDULA

Enterprise Data Platforms | Master Data Management | Data Governance |
Python, Automation & AI Enablement

Hyderabad, India | swapna.gudikandhula@gmail.com | +91 9014074235

EXECUTIVE SUMMARY

- Senior Data Engineer with 13+ years of experience in Enterprise Data Platforms, Master Data Management (MDM), Data Governance, and Data Quality within large-scale enterprise environments.
- Experienced in delivering enterprise MDM solutions with a strong focus on platform stability, continuous improvement, and knowledge sharing across engineering teams.
- Known for combining strong functional understanding with hands-on technical execution to deliver scalable and reliable enterprise data solutions from design through production support.
- Strong experience in designing, developing, and supporting Informatica MDM solutions with expertise in Customer Data Management, Match & Merge, Survivorship, Data Quality, and Enterprise Data Integration.
- Over the years, I have worked closely with business stakeholders, architects, product owners, and engineering teams to understand business requirements and translate them into scalable and governed data solutions. Along with delivery, I have actively contributed to production stability, release management, mentoring team members, and continuous platform improvements.
- While Master Data Management remains my core area of expertise, I have continuously expanded my skills in Python, Automation, AI, APIs, and Cloud technologies to complement my enterprise data platform expertise and stay aligned with evolving industry needs.

CORE COMPETENCIES

Enterprise Data Management

- Enterprise Data Platforms
- Master Data Management (MDM)
- Customer Data Management
- Data Governance
- Data Stewardship
- Data Quality Management
- Metadata Management
- Data Lifecycle Management

Informatica MDM

- Customer 360
- Match & Merge
- Survivorship Rules
- Golden Record Management
- Hierarchy Management
- Data Standardization
- Source System Integration

Delivery & Operational Excellence

- Release Management
- Production Readiness
- Incident Management
- Root Cause Analysis (RCA)
- Continuous Improvement

Leadership & Stakeholder Management

- Technical Leadership
- Cross-functional Collaboration
- Stakeholder Communication
- Requirement Workshops
- Knowledge Sharing
- Team Mentoring

Engineering & Delivery

- Full SDLC
- Agile Delivery
- Production Support
- Functional Analysis
- Solution Design
- Code Reviews

Modern Engineering & AI

- Python
- REST APIs
- Swagger / OpenAPI
- Enterprise LLMs
- AI Enablement
- GitHub
- ServiceNow
- Google Cloud (Foundational)

TECHNICAL SKILLS

- **Data Management & Governance:** Informatica MDM, IDQ, IDD, E360, Customer 360, Data Governance, Data Stewardship, Data Quality
- **Programming:** Python, Java, JavaScript, SQL, Unix Shell Scripting
- **Databases:** Oracle, DB2, SQL Server, Teradata
- **Automation & AI:** Enterprise LLMs (Tachyon), Amelia Orchestration, Swagger/OpenAPI, REST APIs
- **Operations & DevOps:** AutoSys, JIL, Delphix Data Masking, ServiceNow, GitHub
- **Modern Engineering & Cloud:** Google Cloud (Foundational), API Development, Python Automation

PROFESSIONAL EXPERIENCE

Wells Fargo - Senior Data Engineer

May 2019 – Present | Hyderabad

- Serve as the primary Subject Matter Expert (SME) for the enterprise Informatica MDM platform, supporting customer master data across multiple enterprise applications.
- Collaborate with business stakeholders, data owners, architects, and engineering teams to understand business requirements and deliver scalable MDM solutions.
- Design and implement Match & Merge rules, survivorship logic, validations, and data quality improvements to maintain trusted master data.
- Contribute to solution design discussions covering MDM architecture, source system integration, business rules, and production implementation.
- Collaborate with Data Stewards to resolve data quality issues and strengthen data governance processes.
- Support end-to-end solution delivery from requirement analysis through development, testing, deployment, and post-production support.
- Partner with QA teams, release managers, and support teams to ensure successful implementation and stable production releases.
- Review and analyze production issues, perform root cause analysis, and implement long-term solutions in collaboration with cross-functional teams.
- Participate in release planning, deployment validation, and production readiness activities.
- Perform code reviews and mentor team members on MDM concepts, development standards, and production support practices.
- Contribute to architecture discussions and continuous improvement initiatives across enterprise data platforms.
- Selected from approximately 175 nominations to contribute to a strategic Line of Business AI initiative focused on L1 Automation using Enterprise LLMs, Python, Amelia Orchestration, ServiceNow workflows, and API-driven automation.
- Developed Python-based utilities and lightweight API integrations to automate operational tasks and improve engineering efficiency.

Deloitte - Senior Consultant

Feb 2017 – Apr 2019 | Hyderabad

- Delivered Informatica MDM and Data Quality solutions for enterprise clients across customer and product master data domains.
- Worked with business stakeholders to understand master data challenges and translate business requirements into technical solutions.
- Designed Match & Merge logic, survivorship rules, business validations, and data quality processes.
- Configured IDD, BPM workflows, and stewardship processes to support business operations.
- Worked closely with architects, business analysts, QA teams, and cross-functional stakeholders throughout the project lifecycle.
- Supported SIT, UAT, production deployments, and post-production stabilization.
- Contributed to improving data consistency and governance across enterprise applications.

Infosys - Technology Analyst

Sep 2012 – Jan 2017 | Hyderabad

- Worked on enterprise Informatica MDM and ETL implementations across multiple customer engagements.
- Developed MDM components, workflows, and integration processes for customer master data management.
- Configured business rules, Match & Merge logic, survivorship rules, and validation frameworks.
- Built data integration workflows for onboarding data from multiple enterprise source systems.
- Performed data profiling, validation, reconciliation, and exception handling activities.
- Worked across the complete Software Development Life Cycle (SDLC), including requirement analysis, development, testing, deployment, and production support.
- Supported enhancements and maintenance activities for enterprise MDM applications, ensuring stable production operations and continuous improvements.
- Participated in production releases, defect triaging, and post-production support activities.
- Collaborated with business analysts, QA teams, and support teams to ensure successful project delivery.
- Built a strong foundation in enterprise data architecture, governance principles, and large-scale production support.

EDUCATION

Bachelor of Engineering (Computer Science), Chaitanya Bharathi Institute of Technology (CBIT), Hyderabad – 2012

CERTIFICATIONS & RECOGNITION

- Informatica MDM Multidomain Certified
- Google Cloud Digital Leader Certified
- Winner – DataAI Hackathon (2023)
- Winner – CDO Hackathon (2025)
- Runner-up – CDO Hackathon (2026) – Solution selected for consolidation and productionization
- Selected from approximately 175 nominations to contribute to a strategic Line of Business AI initiative focused on L1 Automation
